Skills

+ 4+ years of hands-on experience with Ruby on Rails, with strong expertise in Test-Driven Development (TDD).

+ Proficient in Ruby, JavaScript, React.js, Node.js, and NestJS.

+ Experience with relational (MySQL) and non-relational (MongoDB) databases, including design, optimization, and querying.

+ Basic knowledge of cloud deployments in Google Cloud Run and AWS (S3, EB, Lambda).

+ Skilled in CI/CD workflows and GitHub-based development, including pull requests, code reviews, and automated deployments.

+ Strong problem-solving skills, with experience handling support tickets, delivering quick bug fixes, and developing complex features.

+ C2-level English proficiency, excellent communication skills for cross-team collaboration and client interactions.

+ Experience leading project development teams, ensuring technical alignment and efficient delivery.

+ Familiar with Agile methodologies, including Scrum and Kanban, for managing software development workflows.

+ Passionate about mentoring junior developers and leading client meetings to ensure technical and business alignment.
